

# 1 The Basics: Let's start by choosing a one-sided or two-sided printer

Card printers can print on one or both sides of the card. Graphics, data, photographs, and even bar codes can be printed in a single pass. Several printer choices are available, and a few options are shown at the right. Print speeds are approximately 30 seconds for a single-side, and 40 seconds for a dual-sided card. All models include a 12-month warranty and some even include free loaners.

**One-Sided**  
A: Persona C-30  
B: Zebra P330i

**Two-Sided**  
C: Fargo DTC500 (s)  
D: Zebra P120i

Additional printer models are available.

# 2 Add Features: Add encoding modules or ethernet printing support

Optional features on most models include: Magnetic Stripe Encoders,

All of our standard card printers allow you to print Bar Codes on the card. You may consider using a laminating printer (below) to add durability to your Bar Code. Ask your salesperson which options are available for your specific choice of printer.

Encode Magnetic Stripes .....  
Write to Smart Chips .....

# 3 Add Security & Durability: Add Lamination and Holograms

Choose a printer with an internal laminator for added security and durability. This process covers the card with a tough layer of clear or holographic plastic. Bar Codes last extra long when covered with laminate. Security hologram films are available in generic or custom formats to fit your needs. These printers will laminate one or both sides of the ID card. Ask your salesperson which one of these high-security printers fits your project requirements.

*The Zebra P620i has the lowest cost per card of any two-sided laminating printer.*

**Two-Sided Laminating**  
E: Zebra P640i

*The Fargo HDP600LC uses retransfer technology to print cards in vivid 600 DPI*

**Two-Sided Laminating Retransfer**  
F: Fargo HDP600LC

Additional printer models are available.

# 4 Select the Correct Supplies: Cards, Ribbons, and Laminates

Make sure that your supplies match the job you want your card to perform. A harsh environment may call for a more durable type of card, or even dual-sided laminate. Protect your investment by using original printer ribbons from Zebra and Fargo. All ribbon types, cleaning kits, and card styles, including HID Prox are available from our large inventory of consumable supplies.

Printer Ribbons and Laminates

PVC Cards, Prox Cards  
Smart Cards, DuraFLEX™ Cards

# Badge Software: Start with a versatile product that fits your budget & your goal

Choose a solution that fits your needs. There are several things to consider when implementing your individual project. Whether you need to simply print a card, or if you need to attach to multiple data sources simultaneously, there is a product that fits you perfectly. Asure ID from Synercard is available in several levels. Ask your sales representative which is right for your project needs. We offer training and installation support on all software.

### Levels of Asure ID Software

- A: Exchange - Utilizes multiple data sources, extremely versatile, connects to Time/Attendance and Access Control, even flat text files
- B: Enterprise - Utilizes a single MS Access table or SQL table, data and images can reside in any shared location on your LAN
- C: Express - Utilizes a local MS Access database, data and Images reside on the local PC

# Add Image Capture: Digital Cameras, Signature Pads, Fingerprint Scanners

Your cards can contain photographs, signatures, and even fingerprints that you digitally import into the design at print time. Choose only a camera for the most basic ID cards, or add the convenience of a digital signature pad and fingerprint scanner for added security.

### Capture Images Via:

- A: Fingerprint Scanner
- B: Digital Signature Pad
- C: TWAIN Digital Camera

# Choose Accessories: Snap-Back Badge Reels, Lanyards, Card Holders

There are so many different ways to wear your new ID card. Whether you choose a custom-printed logo badge reel, or a standard vinyl badge clip, we have any attachment that you can think of. Lanyards can be printed with your exact corporate colors and logo. Badge reels are available with a customized label. Badge clips are available in any color. Card holders come in many sizes, and custom sizing is available. From printers and software, to ink ribbons and card holders. We are your complete source for all of your ID Card products.

### ID Accessories:

- A: Badge Reels
- B: Lanyards
- C: Badge Clips
- D: Card Holders
